Mission and aims

The non-for-profit association Music Theatre International, operating in Italy since 1999, was formally founded in 2000.

The association promotes different forms of music theatre; encourages the knowledge and the circulation of the international repertoire; produces and promotes performances and events which involve a synergistic combination of the different languages of live performance with contemporary arts; promotes and supports small Italian arts experiences with young artists, theatre companies, and music and arts non-profit organizations; organizes research, promotional documentation and training activities in the performing arts at a national and international level; collaborates with other non-profit and for-profit organizations, active in the performing arts, providing them with consulting services in marketing, public relations, artistic and project management.

The association has promoted different collaborations and cultural exchange programs with other national and international organizations in Italy and abroad, to make the most of the Italian artistic and professional heritage.
