Countries of action France, Italie, Liban, Tunisie

Mission and aims

Since 1999 Tabasco Video is a Marseille NGO which:

- develops participative televisions,
- trains groups in audiovisual realizations,
- makes documentary and pedagogical films.

Tabasco Video works in the neighborhoods of Marseille. By training them to audiovisual tools, it gives people of any age and from any social and cultural roots, the opportunity to express themselves meeting others and discovering territorial initiatives. Those actions encourage reflection on society issues, develop civic participation, and tend to emphasize alternative ways for a more responsible society based on concept of solidarity.
