Mission and aims

The Sidi Mohammed Ben Abdellah University was established in Fez in 1975. It's one of oldest and prestigious universities of Morocco. It gathers twelve faculties and schools and offers a specialized teaching in the fields of science, technology, Medicine, economics, social, and human sciences. It offers a high number of training programs leading to different degrees: Bachelors, Masters, Doctorates, Engineering diplomas.

The University is aware of the positive outcomes of international collaboration. So, the SMBA University participates to international programmes dedicated to research or education or international cooperation as Tempus, 7th Framework, Erasmus Mundus, Lifelong Learning. Such collaborations allowed the university to perform on the best of ways. The university carry out a good quality of research in various fields related to business-university relations, ICT, environment, sustainable development, water treatment, plants for food, medicine, textiles and dying, traditional Mediterranean colouring technology for the conservation of the cultural heritage, health...

In the last four years, the SMBA University was involved as partner for about 35 European projects and as coordinator for 2 FP7 projects.

On the other hand, the university has set up a technological platform "Cité de l'Innovation" which aims to make the university / industry relation most strong, to promote the technology transfer and to valorize the research results.
